

Speed And Science Ltd.

..."where Tradition meets Modern"

Dealer's News, April 2021

How's your SALES in 2021?

Product sales always accounted for a good chunk of any Moto-Shop gross income, and for a good reason. These days however, many businesses have noticed a drop in retail sales and may require a bit of different approach, even if it means stepping out of your comfort zone. No, we're not experts in Social Media Marketing (we much rather play with chunks of metal), but check this out: one of our Dealers recently went ahead and run an Online Raffle for the entire Speed And Science Top End setup: "The response was much better than anticipated - all tickets were sold out in just over a week! Our phone is still ringing off the hook" said Eric, the shop owner. Too good to be true? Try it and see what happens!

If you're still not 100% convinced, until the end of April 2021 we are offering special pricing on the entire Speed And Science product line (conditions apply). Please ask us how we can save you money!

NEW PRODUCTS

Just to re-cap, at the end of 2020 we have released the Shovelhead 3-1/2" Bore x 4-1/4" Stroke Cylinders. Those are popular items amongst riders who prefer keeping the OEM displacement.

NEW for this year is the **MIT PanShovel** headset. Our unique MIT-series enhancements combined with the old-school Panhead look - a guaranteed delight for any horsepower freak:

As always, please reach out to us with any questions / ideas / concerns you may have - same as you, we're passionate about what we do and happy to help you.

We have most items in stock and ready to ship. However, due to COVID related events, your orders and/or shipping may be delayed.

*We look forward to hearing from you,
Speed And Science Team*
